

## XFI™ Fuel Injection Kits

FAST™, the leader in fuel injection technology, introduces the industry's only "truly complete" electronic fuel injection (EFI) kits. The new XFI™ Fuel Injection Kits include carefully-matched components of the highest quality, starting with the FAST™ XFI™. Another key component included is the revolutionary FAST™ Dual-Sync Distributor. These innovative distributors allow fully sequential operation, yielding better performance, improved idle quality and more precise tuning. The kits also include a single plane aluminum intake manifold, Big Mouth 4-Barrel Throttle Body™, proper size Precision-Flow™ Injectors, aluminum fuel rails, fuel pump filter kit, all necessary sensors and professional quality wiring harnesses with labeled connectors. Most importantly, FAST™ has included its highly regarded EFI Installation & Tuning DVD containing two hours of step-by-step installation and tuning advice.

DESCRIPTION	PART NO.
Small Block Chevy (Up To 550 HP)	3012350-05
Small Block Chevy (Up To 1000 HP)	3012350-10
Big Block Chevy (Up To 550 HP)	3011454-05
Big Block Chevy (Up To 1000 HP)	3011454-10
Small Block Ford (Up To 550 HP)	3031302-05
Small Block Ford (Up To 1000 HP)	3031302-10
Ford Windsor (Up To 550 HP)	3035351-05
Ford Windsor (Up To 1000 HP)	3035351-10

## Dual-Sync Distributors

The new FAST™ Dual-Sync Distributors are user-friendly and designed for use with the FAST™ XFI™ Fuel Injection System. Equipped with dual, discreet signal pickups, they provide fully sequential EFI operation, and the billet 6061-T6 CNC-machined housing ensures long life. Dual-Sync Distributors fit most popular V8 domestic engine applications and don't require modification. Installation is simple: set the engine at TDC, drop in the distributor and turn the base until the LEDs light up. Then, lock it down, and your engine is properly timed. Complete with instructions and proper connectors to plug directly into the XFI™ main harness for an easy, plug and play installation. These come standard with heavy-duty cast iron gears; upgraded polymer and bronze gears are also available. Before installation, check with your camshaft manufacturer to determine which distributor gear is compatible with your specific camshaft core.

DESCRIPTION	PART NO.
Small Block/Big Block Chevy	305005
Small Block Ford	305007
Ford Windsor	305009
Ford FE	305010
Small Block Chrysler	305011
Big Block Chrysler 383-400cid	305012
Big Block Chrysler 426-440cid	305013
