

Precision-Flow™ Fuel Injectors For Gen IV Engines

The FAST™ Precision-Flow™ Fuel Injectors for GM Gen IV engines are the highest flowing injectors available and are uniquely designed for direct installation into LS2 and LS7/L76/L92-style engines. Available in two different height configurations and a wide range of flow rates, the new Precision-Flow™ Fuel Injectors are correctly sized (shorter than the common LS1/LS6 injectors) and feature the right EV6/UScar connector, enabling hassle-free plug-in operation. In addition, the high-impedance, high-flow FAST™ injectors meet/exceed all factory durability standards and quality tolerances.

- Feature highest flow rate of any injector for '05-'08 GM LS2/LS7/L76/L92 engines; available in singles, -4, -6, -8
- A simple drop-in installation available in flow rates up to 57 lb/hr (LS2-type) & 65 lb/hr (LS7/L76/L92-type)
- Available in LS2 & LS7/L76/L92 “shorty” configurations; both styles feature proper OEM EV6/UScar connectors
- These high-impedance Precision-Flow™ Injectors meet/exceed all factory durability standards & tolerances

DESCRIPTION	PART NO.
LS2-Type, EV6/UScar, 33lb/hr, Stock LS2	30332-8
LS2-Type, EV6/UScar, 46lb/hr	30462-8
LS2-Type, EV6/UScar, 57lb/hr	30572-8
L76/L92/LS7-Type Short, EV6/UScar, 39 lb/hr, Stock LS7	30397-8
L76/L92/LS7-Type Short, EV6/UScar, 50 lb/hr	30507-8
L76/L92/LS7-Type Short, EV6/UScar, 65 lb/hr	30657-8

*All injectors are available as singles (-1), sets of (-4), (-6), and (-8)

Fuel Injector Adapter Harnesses & Connector Kits

To further serve the needs of late model GM performance tuners, FAST™ has developed a full line-up of fuel injector adapter harnesses and connector kits. These adapters allow a retro-fit of both new and old style electronic fuel injectors. New style fuel injectors, such as those found on GM's Gen IV engines featuring EV6/UScar connectors, can be retro-fitted and used on vehicles equipped with older-style EV1/Minitimer harnesses. Use our newly developed FAST™ Fuel Injector Adapter Harness to retro-fit an EV1 injector into an EV6 harness. FAST™ has also designed connector kits, either EV1 or EV6, which allow you to re-wire your existing harness with the correct injector connections. The connector kits come complete with terminals, seals and plugs, ensuring you have everything you need to complete the swap.

- Easy, plug-and-play design; eliminates the headache of splicing wires, etc.
- Offers a clean, professional solution for adapting new & old style injectors
- Several styles available to fit your specific GM late model engine combination
- Purchase as complete adapter harnesses or do-it-yourself connector kits, in singles or eight packs

DESCRIPTION	PART NO.
EV1 - Single	170599-1
EV1 - 8 Pack	170599-8
EV6 - Single	170600-1
EV6 - 8 Pack	170600-8
Adapter EV1 to EV6 Connector - Single	170603-1
Adapter EV1 to EV6 Connector - 8 Pack	170603-8
Adapter EV6 to EV1 Connector - Single	170604-1
Adapter EV6 to EV1 Connector - 8 pack	170604-8
