

Billet Bottle Brackets

The new ZEX™ Billet Bottle Brackets add a professional touch to any nitrous system installation with a ZEX™-designed, unique split arm system to enhance bottle installation and removal, even in the tightest locations. Incorporating thumb “wheels” which are easily turned by hand to quickly tighten or release the bottle, the ZEX™ Billet Bottle Brackets are the best looking and easiest to use nitrous oxide bottle mounts available.

GM LSX™ Nitrous System

The new ZEX™ GM LSX™ Nitrous System was designed specifically for plug and play installation on any late model GM vehicle powered by the LSX™ engines (LS1, -2, -6). ZEX™ electronics use the vehicle's TPS sensor to activate the nitrous only at wide-open throttle.

- Adjustable from 75 to 175 hp
- Patented ZEX™ Active Fuel Control™ adjusts enrichment fuel with bottle pressure so you're never too rich or too lean
- Uses the vehicle's TPS sensor to activate; the ultimate in safe nitrous engagement

GM LSX™ Nitrous System	82235

Turbo Nitrous System

The Turbo Nitrous System from ZEX™ is the first nitrous system designed purposely to spool up turbocharged engines. It eliminates boost lag for instant turbo power and shuts off the nitrous once the turbo has spooled up.

- Tunable from 25 to 75 hp
- Features a patented electronic TPS switch for perfect activation at wide-open throttle
- Actively adjusts fuel enrichment with variations in bottle pressure so you're never too rich or too lean
