

Pro Torker™ Chevy Vortec Assembled Cylinder Heads

RHS™ Pro Torker™ Chevy Vortec Assembled Cylinder Heads are an excellent performance value, offering a premium grade cast iron cylinder head for increased resistance to cracking. Able to use both Vortec and early General Motors style intake manifolds, courtesy of the dual bolt pattern system, they are a great choice for both racers limited to cast iron original style heads and production rebuilders looking for a quality head.

Perhaps most importantly, the RHS™ Pro Torker™ Vortec Assembled Cylinder Heads benefit from the use of track-proven COMP Cams® valve train components. Featuring stock volume intake runner volumes and 64cc chambers, these heads use premium COMP Cams® valve springs, steel retainers and ancillary components, along with 2.020-inch intake and 1.600-inch exhaust valves.

PART #	DESCRIPTION	VALVE TRAIN TYPE	VALVE SIZE	APPLICATION
Cast Iron (64cc Chamber, Straight Plug) - Ready To Assemble				
12407	Pro Torker™ Vortec 23° - 170cc, Straight Plug	Flat Tappet	1.940"/1.500" Stock Length	327-350c.i.
12410	Pro Torker™ Vortec 23° - 170cc, Straight Plug	Flat Tappet	2.020"/1.600" +.100" Long	350-383c.i.
