

Big Block Chevrolet 48mm IDA Weber Eight Stack Induction System

Inglese™ announces the arrival of their ready-to-bolt-on Big Block Chevrolet 48mm IDA Weber Eight Stack Induction System. The stunning, high performance induction package features pre-tuned jetting and pre-synchronized linkage for easy hassle-free installation. The blueprinted Weber carbs eliminate stereotypical Weber challenges and provide excellent tire-shredding power for supreme street or racing performance. The Inglese™ Big Block Chevrolet Induction Systems are completely customizable to the buyer's needs, including optional custom painting, chrome finishes and highly polished components. The Inglese™-cast taller intake floor provides excellent performance and increases the cool-factor, making for a really tall system that looks great. For everything from street rods and muscle cars to race cars, nothing can match this impressive induction system.

Twin Sidedraft Weber Induction System

The brain of the new Twin Sidedraft System is two Weber carburetors, available for 500-650 cfm, which are legendary in the aftermarket community for their snappy throttle response, low-end torque and classic style. Another benefit of the Twin Sidedraft design is the position of the carburetors, which sit away from the intake manifold, keeping the fuel cooler and providing a denser air charge. These systems will directly bolt on to any 4-barrel manifold application. The Inglese™ Twin Sidedraft Weber Induction System offers complete customization, including your choice of paint, chrome, stacks and filters to top off your engine package. Taking the customization one step further, Inglese™ tailors each carburetor setup to fit your overall performance goals while maintaining smooth operation and excellent drivability. Simply stated, these units are ready to take out of the box, bolt on and start up.

Inglese™ Weber Carb Accessories

Inglese™ Weber carb accessories include all the pieces to make your throttle system work perfectly and look great. Inglese™ 4-Carb Weber Induction Linkage Kits are precision engineered to provide perfect operation and are offered either in the standard anodized finish or optional chrome for added impact. The Inglese™ 4-Carb Weber Induction Linkage Kits are pre-engineered for Weber carburetion application and can be purchased as complete systems or sold individually and include Weber linkages, roller bearing bell cranks, hardware and link bars.

Other Weber carb accessories available from Inglese™ include the Velocity Stack Nylon Filter Booties. The Inglese™ Velocity Stack Nylon Filter Booties are made from elastic nylon material that are low-restriction and slip on and off easily. Available in four different size stack diameters from 2.75-inch to 3.75-inch, these are an inexpensive option to air cleaners or screen filters.
