

■ WIDE-BAND AIR/FUEL GAUGE KIT

The FAST™ Wide-Band Air/Fuel Gauge Kit combines a super fast and accurate 2 1/16" gauge, Bosch wide-band oxygen sensor and stand-alone sensor control unit, all in an easy-to-use and install package. The compact gauge mounts easily in the interior of any vehicle, is back-lit for easy night viewing and can be wired so it is powered up whenever the engine is running. This kit is not only for serious power tuning, but it's also ideal for monitoring the overall fuel tune of the engine when daily driving or making passes at the track.

■ MASTER TUNER DUAL SENSOR AIR/FUEL METER KIT

FAST™ has put together a Master Tuner Dual Sensor Air/Fuel Meter Kit that contains air/fuel meters to measure all popular fuel types, including: gasoline, methanol, ethanol blends, diesel and bio-diesel. This is the only kit on the market that comes with everything needed to test all fuel types without time consuming meter recalibrations. All meters feature easy-to-use, built-in data loggers that don't require you to download to a laptop, but simply play back with the air/fuel information on the units' backlit display screens in real time.

- Uses two oxygen sensors to check air/fuel ratio in two locations
- Includes rpm module to display and record air/fuel ratios with engine rpm
- Includes built-in data logger, outputs for external data loggers and digital gauges

■ EZ CLAMP-ON TAILPIPE WIDE-BAND SENSOR MOUNT KIT

While FAST™ offers a supremely accurate wide-band air/fuel meter, the key to getting a precise reading is to ensure you tune with the correct information. The FAST™ EZ Clamp-On Tailpipe Wide-Band Sensor Mount Kit attaches to your vehicle's tailpipe so you can accurately measure exhaust wide-band readings to log in. The tailpipe kit allows for wide-band sensor set-up to be completed within a few short minutes; no welding or any modifications to the vehicle or factory O₂ sensors are required.
