

## PRO ACTION™ SBF CYLINDER HEADS

The Ford Small Block has become one of the most popular performance engine platforms chiefly due to the wealth of 5.0-liter engines available today. RHS™ Pro Action™ Small Block Ford Cylinder Heads are a perfect performance upgrade for your street or race vehicle because they simply bolt up and go. Available in high-quality aluminum, bare or assembled with COMP Cams® components, RHS™ Pro Action™ Small Block Ford Cylinder Heads feature Clean Cast Technology™, making them excellent performing heads right out of the box without porting or other modifications. The more efficient water jacket design generates greater thermal conductivity and reduces the risk of detonation. Premium bronze intake and exhaust valve guides provide extended valve sealing and durability.

- Fits 289-351cid Windsor and 5.0-liter applications
- Clean Cast Technology™ for performance right out of the box
- Smaller valve package allows usage without piston modification
- Dual bolt pattern exhaust for both stock exhaust manifold and large tube headers
