

## ■ SIDE-X-SIDE NITROUS SYSTEM

The ZEX™ Side-X-Side Nitrous System is an easy-to-install package that offers everything you need to add 10 to 25 horsepower to any stock or highly modified Side-X-Side. The kit includes the bottle, solenoids, injection nozzle and high pressure hoses, as well as an auxiliary fuel pump that ensures plenty of fuel flow for generating safe and efficient power. Unlike other systems, this high-tech nitrous system includes a 10 lb. bottle that lets you go all day without running out of nitrous.

- Power settings are adjustable from 10 to 25 additional horsepower
- Includes auxiliary fuel pump for upgrading fuel flow
- Active Fuel Control™ nozzle adjusts fuel enrichment with bottle pressure

DESCRIPTION	PART #
Side-X-Side Nitrous System	82313

## ■ RACE PERIMETER PLATE NITROUS SYSTEMS

These race kits are fully adjustable between 125 and 450 horsepower. Featuring ZEX™ Perimeter Injection™ Technology, nitrous is injected directly into the intake manifold plenum in a 360-degree ring to smooth out distribution. The system also benefits from Cryo-Sync™ Technology to lower the temperature of the carb and manifold surfaces, creating a cooler, denser nitrous/fuel/air charge entering the engine. Available with 10 or 15 lb. bottle.

- Add anywhere from 125 to 450 horsepower
- Nitrous bottles available in 10 lb. or 15 lb. size
- Both square flange & Dominator intake manifold applications available

DESCRIPTION	PART #
Square Flange Race Perimeter Plate System (10 lb. Bottle)	82311
Square Flange Race Perimeter Plate System (15 lb. Bottle)	82237
Dominator Race Perimeter Plate System (10 lb. Bottle)	82312
Dominator Race Perimeter Plate System (15 lb. Bottle)	82310

## ■ FUEL FLOW CHECK TOOL

Setting your nitrous system's fuel pressure can be a challenge so ZEX™ created the Fuel Flow Check Tool. By temporarily attaching it to your fuel solenoid's feed line, you simulate the normal fuel flow your nitrous system sees when it is activated. Once your fuel system is in this "flowing" condition, you can adjust your fuel pressure regulator.

- Compatible with any carbureted nitrous system
- Includes 0-15psi gauge and -4AN and -6AN adapters
- Includes calibrated flow jets for nitrous systems jetted from 100 to over 400 hp
